## Note 1 - General information

### **Description of the business**

See "Business description" presented in the annual report.

### **The SpareBank 1 SMN Group**

SpareBank 1 SMN's head office is in Trondheim, no. 4 Søndre gate. The Bank's market areas are essentially Trøndelag and Nordvestlandet.

The Group accounts for 2017 were approved by the Board of Directors on 28 February 2018.

## Note 2 - Accounting principles

### Basis for preparing the consolidated annual accounts

The Group accounts for 2017 for SpareBank 1 SMN have been prepared in conformity with International Financial Reporting Standards (IFRS) which have been given effect in Norway. These include interpretations from the International Financial Reporting Interpretations Committee (IFRIC) and its predecessor, the Standing Interpretations Committee (SIC). The measurement base for both the parent bank and group accounts is historical cost with the modifications described below. The accounts are presented based on IFRS standards and interpretations mandatory for accounts presented as at 31 December 2017.

### Implemented accounting standards and other relevant rule changes in 2017

The applied accounting principles are consistent with the principles applied in the preceding accounting period, with the exception of those changes to IFRS which have been implemented by the group in the current accounting period. Below is a list of amendments to IFRS with effect for the 2017 accounts that have been relevant, and the effect they have had on the group's annual accounts.

The following new and amended accounting standards and interpretations were applied for the first time in 2017:

#### *IAS 12 Income taxes - amendment*

The amendments clarify how to report assets for deferred tax related to unrealised losses on debt instruments valued at fair value. Specifically, it clarifies that unrealised losses on debt instruments measured at fair value in the accounts, and at cost for tax purposes, result in tax-reducing temporary differences regardless of how the owner expects to recover the capitalised amount. The amendments clarify the accounting treatment for recognition of deferred tax assets to debt instruments that are measured at fair value in certain cases.

The amendments will have effect from 1 January 2017 and has been implemented retrospectively.

#### *IFRS 12 Disclosure of Interests in Other Entities - amendment*

The amendments clarify that some of the Notes to the Standard apply to an entity's interests in subsidiaries, joint ventures or associates that are classified as (or included in a disposal group classified as) held for sale.

The amendment has been implemented retrospectively.

#### *IAS 7 Statement of Cash Flows - amendment*

IAS 7 has been amended by introducing a disclosure requirement relating to changes in financial liabilities arising from financing activities. The change does not entail any changes in the recognition and measurement of financial liabilities.

### Presentation currency

The presentation currency is the Norwegian krone (NOK), which is also the bank's functional currency. All amounts are stated in millions of kroner unless otherwise specified.

### Consolidation

The consolidated accounts include the Bank and all subsidiaries which are not due for divestment in the near future and are therefore to be classified as held for sale under IFRS 5. All undertakings controlled by the Bank, i.e. where the Bank has the power to control the undertaking's financial and operational principles with the intention of achieving benefits from the undertaking's activities, are regarded as subsidiaries. Subsidiaries are consolidated from the date on which the Bank has taken over control, and are deconsolidated as of the date on which the Bank relinquishes control. Mutual balance sheet items and all significant profit elements are eliminated.

Upon takeover of control of an enterprise (business combination), all identifiable assets and liabilities are recognised at fair value in accordance with IFRS 3. A positive difference between the fair value of the consideration and the fair value of identifiable assets and liabilities is recorded as goodwill, while any negative difference is taken to income upon purchase. Accounting for goodwill after first-time recognition is described under the section on intangible assets.

All intra-group transactions are eliminated in the preparation of the consolidated accounts. The non-controlling interests' share of the group result is to be presented on a separate line under profit after tax in the income statement. In the statement of changes in equity, the non-controlling interests' share is shown as a separate item.

### Associated companies

Associates are companies in which the Bank has substantial influence. As a rule, influence is substantial where the Bank has an ownership interest of 20 per cent or more. Associates are accounted for by the equity method in the consolidated accounts. The investment is initially recognised at acquisition cost and subsequently adjusted for the change in the Bank's share of the associated undertaking's net assets. The Bank recognises its share of the profit of the associated undertaking in its income statement. Associates are accounted for in the parent bank accounts by the cost method. See also note 39 Investments in owner interests.

### Joint ventures

Joint ventures may take the form of jointly controlled operations, jointly controlled assets or jointly controlled entities. Joint control entails that the Bank by agreement exercises control together with other participants. The Bank accounts for jointly controlled operations and jointly controlled assets by recognising the Bank's proportional share of assets and liabilities in the Bank's accounts. The governance structure for the SpareBank 1 collaboration is regulated by agreement between the owners. The group classifies its participation in some companies as investments in jointly controlled entities and accounts for them by the equity method. See also note 39 Investments in owner interests.

### Loans and loan losses

Loans are measured at amortised cost in accordance with IAS 39. Amortised cost is acquisition cost less repayments of principal, plus or minus cumulative amortisation resulting from the effective interest rate method, with deductions for any value fall or loss likelihood. The effective interest rate is the interest rate which precisely discounts estimated future cash in- or out-payments over the financial instrument's expected lifetime.

Fixed interest loans to customers are recognised at fair value. Gains and losses due to changes in fair value are recognised in the income statement as fair value changes. Accrued interest and premiums/discounts are recognised as interest. Interest rate risk on fixed interest loans is managed through interest rate swaps which are recognised at fair value. It is the group's view that recognising fixed interest loans at fair value provides more relevant information on carrying values.

### Write-downs

Amounts recorded on the Bank's statement of financial position are reviewed on the balance sheet date for any indications of value impairment. Should such indications be present, an estimate is made of the asset's recoverable amount. Each year on the balance sheet date recoverable amounts on goodwill, assets with unlimited useful lifetime, and intangible assets not yet available for use, are computed. Write-downs are undertaken when the recorded value of an asset or cash-flow-generating entity exceeds the recoverable amount. Write-downs are recognised in profit/loss. Write-down of goodwill is not reversed. In the case of other assets, write-downs are reversed where there is a change in the estimates used to compute the recoverable amount.

### Individual write-downs on financial assets

Impairment on loans is incurred if, and only if, there exists objective evidence of impairment which may entail reduced future cash flow to service the exposure. Impairment must be a result of one or more events occurring after first-time recognition (a loss event), and it must be possible to measure the result of the loss event(s) reliably. Objective evidence of impairment of a financial asset includes observable data which come to the group's knowledge on the following loss events:

- significant financial difficulties on the part of the issuer or borrower
- a not insignificant breach of contract, such as failure to pay instalments and interest
- the group grants the borrower special terms in light of financial or legal aspects of the borrower's situation
- the debtor is likely to start debt negotiation or other financial restructuring
- active markets for the financial asset are closed due to financial problems.

The group assesses first whether individual objective evidence exists that individually significant financial assets have suffered impairment.

Where there is objective evidence of impairment, the size of the impairment is measured as the difference between the asset's carrying value and the present value of estimated future cash flows (excluding future credit losses that have not been incurred), discounted at the financial asset's original effective interest rate. The carrying value of the asset is reduced through a provision account and the loss is recognised in the income statement.

Assets that are individually tested for impairment, and where impairment is identified, or is still being identified, are not included in an overall assessment of impairment.

### Collective write-downs on loans

In the case of financial assets which are not individually significant, the objective evidence of value impairment is assessed on an individual or collective basis. Should the group decide that no objective evidence exists of value impairment of an individually assessed financial asset, significant or not, that asset is included in a group of financial assets sharing the same credit risk characteristics.

In the assessment of collective write-downs account is taken inter alia of the following:

- observable data indicating a measurable reduction in future cash flows from a group of financial assets since first-time recognition, even if the reduction cannot yet be fully identified to an individual financial asset in the group including:
  - an unfavourable development in payment status for borrowers in the group
  - national or local economic conditions correlating with defaults of assets in the group.

Impairment of groups of financial assets is measured by the trend in rating for such groups. This is done by measuring negative migration and change in expected loss over the portfolio's lifetime.

Determining customer migration involves continuous assessment of the creditworthiness of each individual customer in the Bank's credit assessment systems.

In the case of events that have occurred but have yet to be reflected in the Bank's portfolio monitoring systems, the need for impairment write-downs is estimated group-wise using stress test models.

#### **Non-performing/potential problem loans**

The overall exposure to a customer is regarded as non-performing once instalment and interest payments are 90 days or more past due or credit lines are overdrawn by 90 days or more. Loans and other exposures which are not non-performing but where the customer's financial situation makes it likely that the group will incur loss, prompting an individually assessed write-down, are classified as potential problem loans.

#### **Impairment of loans recognised at fair value**

At each balance sheet date the group assesses whether evidence exists that a financial asset or group of financial assets recognised at fair value is susceptible to impairment. Losses due to impairment are recognised in the income statement in the period in which they arise.

#### **Actual losses**

Where the balance of evidence suggests that the losses are permanent, the losses are classified as actual losses. Actual losses covered by earlier specified loss provisions are reflected in such loss provisions. Actual losses not covered by loss provisions, as well as surpluses and deficits in relation to earlier loss provisions, are recognised in the income statement.

#### **Reposessed assets**

As part of its treatment of defaulted loans and guarantees, the Bank in a number of cases takes over assets furnished as collateral for such exposures. Upon repossession the assets are valued at their presumed realisable value. Any deviation from the carrying value of a defaulted or written down exposure upon takeover is classified as a loan write-down. Reposessed assets are carried according to type. Upon final disposal, the deviation from carrying value is reported in profit or loss in accordance with the type of asset as per the accounts.

#### **Non-current assets held for sale and discontinued operations**

Assets which the board of directors of the bank has decided to sell are dealt with under IFRS 5 if it is highly likely that the asset will be sold within 12 months. This type of asset comprises for the most part assets taken over in connection with bad loans, and investments in subsidiaries held for sale. In the case of depreciable assets, depreciation ceases when a decision is taken to sell, and the asset is measured at fair value in accordance with IFRS 5. The result of such activity and appurtenant assets and liabilities are presented on a separate line as held for sale.

#### **Leases**

Financial leases are entered under the main item 'loans' in the balance sheet and accounted for at amortised cost. All fixed revenues within the lease's expected lifetime are included when computing the contract's effective interest.

#### **Securities and derivatives**

Securities and derivatives comprise shares and units, money market instruments and bonds, and derivative currency, fixed income and equity instruments. Shares and units are classified either at fair value through profit/loss or as available for sale. Money market instruments and bonds are classified at fair value through profit/loss, loans and receivables or in the category held to maturity. Derivatives are invariably recognised at fair value through profit/loss unless they are part of a cash flow hedge. However the Bank does not avail itself of cash flow hedges.

All financial instruments classified at fair value through profit/loss are measured at fair value, and any change in value from the opening balance is recognised as revenue from other financial investments. Financial assets held for trading purposes are characterised by frequent trading and by positions being taken with the aim of short-term gain. Other such financial assets classified at fair value through profit/loss are investments defined upon first-time recognition as classified at fair value through profit/loss (fair value option).

Financial derivatives are presented as assets when fair value is positive, and as liabilities when fair value is negative.

Shares and units classified as available for sale are also measured at fair value, but any change in value from the opening balance is recognised in the comprehensive income statement and is accordingly included in the group's other comprehensive income. Shares which cannot be reliably measured are valued at cost price under IAS 39.46 (c). Procedures for ongoing valuation of all equity investments have been established. These valuations are carried out at differing intervals in based on the size of the investment.

Money market instruments and bonds classified as loans and receivables or held to maturity are measured at amortised cost using the effective interest rate method; see the account of this method under the section on loans.

**Intangible assets**

Intangible assets mainly comprise goodwill in the SpareBank 1 SMN Group. Other intangible assets will be recognised once the conditions for entry in the balance sheet are present. Goodwill arises as the difference between the fair value of the consideration upon purchase of a business and the fair value of identifiable assets and liabilities; see description under Consolidation. Goodwill is not amortised, but is subject to an annual depreciation test with a view to revealing any impairment, in keeping with IAS 36. Testing for value impairment is done at the lowest level at which cash flows can be identified.

Intangible assets acquired separately are carried at cost. Useful economic life is either finite or infinite. Intangible assets with a finite economic life are depreciated over their economic life and tested for impairment upon any indication of impairment. The depreciation method and period are assessed at least once each year.

**Property, plant and equipment**

Property, plant and equipment along with property used by the owner are accounted for under IAS 16. The investment is initially recognised at its acquisition cost and is thereafter depreciated on a linear basis over its expected useful life. When establishing a depreciation plan, the individual assets are to the necessary extent split up into components with differing useful life, with account being taken of estimated residual value. Property, plant and equipment items which individually are of little significance, for example computers and other office equipment, are not individually assessed for residual value, useful lifetime or value loss, but are assessed on a group basis. Property used by the owner, according to the definition in IAS 40, is property that is mainly used by the Bank or its subsidiary for its own use.

Property, plant and equipment which are depreciated are subject to a depreciation test in accordance with IAS 36 when circumstances so indicate.

Property held in order to earn rentals or for capital appreciation is classified as investment property and is measured at fair value in accordance with IAS 40. The group has no investment properties.

**Interest income and expenses**

Interest income and expenses related to assets and liabilities which are measured at amortised cost are recognised in profit/loss on an ongoing basis using the effective interest rate method. Charges connected to interest-bearing funding and lending are included in the computation of effective interest rate and are amortised over expected lifetime. In the case of interest-bearing instruments measured at fair value, the market value will be classified as income from other financial investments. In the case of interest-bearing instruments classified as loans and receivables or held to maturity and not utilised in hedging contexts, the premium/discount is amortised as interest income over the term of the contract.

**Commission income and expenses**

Commission income and expenses are generally accrued in step with the provision of the service. Charges related to interest-bearing instruments are not entered as commission, but are included in the calculation of effective interest and recognised in profit/loss accordingly. Consultancy fees accrue in accordance with a consultancy agreement, usually in step with the provision of the service. The same applies to ongoing management services. Fees and charges in connection with the sale or mediation of financial instruments, property or other investment objects which do not generate balance sheet items in the Bank's accounts are recognised in profit/loss when the transaction is completed. The Bank receives commission from SpareBank 1 Boligkreditt and SpareBank 1 Næringskreditt corresponding to the difference between the interest on the loan and the funding cost achieved by SpareBank 1 Boligkreditt and SpareBank 1 Næringskreditt. This shows as commission income in the Bank's accounts.

**Transactions and holdings in foreign currency**

Transactions in foreign currency are converted to Norwegian kroner at the transaction exchange rate. Gains and losses on executed transactions or on conversion of holdings of monetary items on the balance sheet date are recognised in profit/loss. Gains and losses on conversion of items other than monetary items are recognised in the same way as the appurtenant balance sheet item.

**Hedge accounting**

The Bank evaluates and documents the effectiveness of a hedge in accordance with IAS 39. The Bank employs fair value hedging to manage its interest rate risk. In its hedging operations the Bank protects against movements in the market interest rate. Changes in credit spread are not taken to account when measuring hedge effectiveness. In the case of fair value hedging, both the hedging instrument and the hedged object are recorded at fair value, and changes in these values from the opening balance are recognised in profit/loss.

**Fair value option**

The Parent Bank's fixed rate loans are recognised in profit/loss at fair value by using the fair value option, in accordance with IAS 39, and the Bank manages interest rate risk related to these loans through the use of derivatives.

**Income taxes**

Tax recorded in the income statement comprises tax in the period (payable tax) and deferred tax. Period tax is tax calculated on the

taxable profit for the year. Deferred tax is accounted for by the liability method under IAS 12. Calculation of deferred tax is done using the tax rate in effect at any time. Liabilities or assets are calculated on temporary differences i.e. the difference between balance-sheet value and tax-related value of assets and liabilities. However, liabilities or assets are not calculated in the case of deferred tax on goodwill for which there is no deduction for tax purposes, nor on first-time-recognised items which affect neither the accounting nor the taxable profit.

A deferred tax asset is calculated on a tax loss carryforward. Deferred tax assets are recognised only to the extent that there is expectation of future taxable profits that enable use of the tax asset. Withholding tax is presented as period tax. Wealth tax is presented as an operating expense in the group accounts under IAS 12.

#### **Deposits from customers**

Customer deposits are recognised at amortised cost.

#### **Debt created by issuance of securities**

Loans not included in hedge accounting are initially recognised at acquisition cost. This is the fair value of the compensation received after deduction of transaction fees. Loans are thereafter measured at amortised cost. Any difference between acquisition cost and settlement amount at maturity is accordingly accrued over the term of loan using the effective rate of interest on the loan. The fair value option is not applied in relation to the group's debt.

#### **Subordinated debt and hybrid capital**

Subordinated debt and hybrid capital issued before 2012 are classified as liabilities in the statement of financial position and are measured at amortised cost like other long-term loans. Subordinated debt ranks behind all other debt. Hybrid capital denotes bonds with a nominal interest rate, but the Bank is not obliged to pay interest in a period in which no dividend is paid, nor does the investor subsequently have a right to interest that has not been paid, i.e. the interest does not accumulate. Hybrid Capital issued after 2012 have been classified as equity since these do not satisfy the definition of a financial liability in IAS 32. The bond is perpetual and SpareBank 1 SMN has the right to not pay interest to the investors. The interest will not be presented as an interest expense in the income statement, but as a reduction to equity. See also note 3 for a closer description. The treatment of subordinated debt and hybrid capital in the calculation of the group's capital adequacy is described in note 5 Capital adequacy and capital management.

#### **Contingent liabilities**

The Bank issues financial guarantees as part of its ordinary business. Loss assessments are made as part of the assessment of loan losses, are based on the same principles and are reported together with loan losses. Provisions are made for other contingent liabilities where there is a preponderant likelihood that the commitment will materialise and the financial consequences can be reliably measured. Information is disclosed on contingent liabilities which do not meet the criteria for recognition where such commitments are substantial. Restructuring expenses are provisioned in cases where the Bank has a contractual or legal obligation.

#### **Pensions**

The SpareBank 1 SMN Group has a pension scheme for its staff that meet the requirements set for mandatory occupational pensions. SpareBank 1 SMN had a defined benefit scheme previously. This was terminated from 1 January 2017. The settlement gain was in accordance with IAS 19 taken to the income statement in 2016 when the decision was made. The Group employees transferred to a defined contribution scheme.

#### **Defined contribution scheme**

Under a defined contribution pension scheme the group does not provide a future pension of a given size; instead the group pays an annual contribution to the employees' collective pension savings. The future pension will depend on the size of the contribution and the annual return on the pension savings. The group has no further obligations related to employees' labour contribution after the annual contribution has been paid. There is no allocation for accrued pension obligations under such schemes. Defined contribution schemes are directly expensed. Any pre-paid contributions are recognised as an asset (pension assets) to the extent the contribution can be refunded or reduce future inpayments.

The contributions are made to the pension fund for full-time employees, and the contribution is from 7 per cent from 0-7,1 G and 15 per cent from 7.1 – 12 G. The premium is expensed as incurred. See also note 24 Pensions.

#### **Early retirement pension scheme ("AFP")**

The banking and financial industry has established an agreement on an early retirement pension scheme ("AFP"). The scheme covers early retirement pension from age 62 to 67. The Bank pays 100 per cent of the pension paid from age 62 to 64 and 60 per cent of the pension paid from age 65 to age 67. Admission of new retirees ceased with effect from 31 December 2010. The Act on state subsidies in respect of employees who take out contractual pension in the private sector (AFP Subsidies Act) entered into force on 19 February 2010. Employees who take out AFP with effect in 2011 or later will receive benefits under the new scheme. The new AFP scheme represents a lifelong add-on to National Insurance and can be taken out from age 62. Employees accumulate AFP entitlement at an annual rate of 0.314 per cent of pensionable income capped at 7.1G up to age 62. Accumulation under the new scheme is calculated with reference to the employee's lifetime income, such that all previous working years are included in the qualifying basis.

For accounting purposes the new AFP scheme is regarded as a defined benefit multi-employer scheme. This entails that each employer accounts for its pro rata share of the scheme's pension obligation, pension assets and pension cost. If no calculations of the individual components of the scheme and a consistent and reliable basis for allocation are available, the new AFP scheme will be accounted for as a defined-contribution scheme. At the present time no such basis exists, and the new AFP scheme is accordingly accounted for as a defined-contribution scheme. The new AFP scheme will only be accounted for as a defined-benefit scheme once reliable measurement and allocation can be undertaken. Under the new scheme, one-third of the pension expenses will be funded by the State, two-thirds by the employers. The employers' premium will be fixed as a percentage of salary payments between 1G and 7.1G.

In keeping with the recommendation of the Norwegian Accounting Standards Board, no provision was made for the group's de facto AFP obligation in the accounting year. This is because the office that coordinates the schemes run by the main employer and trade union organisations has yet to perform the necessary calculations.

### **Segment reporting**

SpareBank 1 SMN has Retail Banking and Corporate Banking, along with the most important subsidiaries and associates as its primary reporting segments. The group presents a sectoral and industry distribution of loans and deposits as its secondary reporting format. The group's segment reporting is in conformity with IFRS 8.

### **Dividends and gifts**

Proposed dividends on equity certificates and gifts are recognised as equity capital in the period to the declaration of dividends by the bank's supervisory board.

### **Events after the balance sheet date**

The annual accounts are regarded as approved for publication once they have been considered by the board of directors. The supervisory board and regulatory authorities can thereafter refuse to approve the accounts, but not to change them. Events up to the time at which the accounts are approved for publication, and which relate to circumstances already known on the balance sheet date, will be included in the information base for accounting estimates and thus be fully reflected in the accounts. Events concerning circumstances that were not known on the closing date will be illuminated if significant.

The accounts are presented on the going-concern assumption. In the view of the board of directors this assumption was met at the time the accounts were approved for presentation.

The board of directors' proposal for dividends is set out in the directors' report and in the statement of changes in equity.

### **New or revised accounting standards approved but not implemented in 2017**

Those standards and interpretations that have been adopted up to the date of presentation of the consolidated accounts, but whose entry into force is scheduled for a future date, are set out below. The group's intention is implement the relevant changes at the time of their entry into force, on the proviso that the EU approves the changes before presentation of the consolidated accounts.

#### *IFRS 9 Financial Instruments*

IFRS 9 Financial Instruments will replace IAS 39 Financial Instruments – Recognition and Measurement. IFRS 9 deals with recognition, classification, measurement and derecognition of financial assets and liabilities as well as hedge accounting. IFRS 9 will apply as from 1 January 2018 and is approved by the EU. For an overview of the quantitative impact of implementing IFRS 9, see note 45.

A description of new requirements under IFRS 9 and changes from earlier standards is set out below. That is followed by a description of the choices made by SpareBank 1 SMN and of the current status of the implementation project.

#### Classification and measurement

##### Financial assets

Under IFRS 9 financial assets are classified in three measurement categories: fair value with changes in fair value reported in profit/loss (FVPL), fair value with changes in fair value reported in other comprehensive income (OCI), and amortised cost. The measurement category is determined upon first-time recognition of the particular asset. For financial assets a distinction is drawn between debt instruments and equity instruments. The classification of financial assets is determined on the basis of contractual terms and conditions for the financial assets and the business model used to manage the portfolio of which the assets are a part.

##### Financial assets that are debt instruments

Debt instruments with contractual cash flows that are only payment of interest and principal on given dates and which are held in a business model whose purpose is to receive contractual cash flows shall in principle be measured at amortised cost. Instruments with contractual cash flows that are only payment of interest and principal on given dates and which are held in a business model whose purpose is both to receive contractual cash flows and sales shall in principle be measured at fair value with changes over OCI, with interest income, currency conversion effects and any write-downs reported in ordinary profit/loss. Fair value changes over OCI shall be reclassified to profit/loss upon the sale or other disposal of the assets.

Other debt instruments shall be measured at fair value with changes reported in profit/loss. This applies to instruments with cash flows that are not only payment of normal interest (time value of money, credit margin and other normal margins related to loans and receivables) and principal, and instruments held in a business model whose main purpose is not that of receiving contractual cash flows. The preliminary assessment is that designation of financial instruments at fair value will be at about the same level as today.

#### Derivatives and investments in equity instruments

All derivatives shall be measured at fair value with changes reported in profit/loss, but derivatives designated as hedging instruments shall be accounted for in keeping with the principles for hedge accounting. Investments in equity instruments shall be measured in the balance sheet at fair value. Value changes shall as a main rule be reported in ordinary profit/loss, but an equity instrument which is not held for trading purposes and is not a contingent consideration following a business transfer can be designated as measured at fair value with changes reported in OCI. Where equity instruments are designated at fair value with value changes reported in OCI, ordinary proceeds shall be reported in profit/loss, whereas value changes shall not be reported in profit/loss either on an ongoing basis or upon disposal.

#### Financial liabilities

For financial liabilities the rules are essentially the same as under today's IAS 39. As a main rule financial liabilities shall continue to be measured at amortised cost with the exception of financial derivatives measured at fair value, financial instruments forming part of a trading portfolio and financial liabilities accounted for at fair value with value changes recognised in profit/loss.

#### Hedge accounting

IFRS 9 simplifies the requirements on hedge accounting in that hedge effectiveness is linked more closely to the management's risk management and gives more scope for assessment. The requirement of hedge effectiveness of 80-125 per cent is removed and replaced with more qualitative requirements, including the requirement of an economic relation between the hedging instrument and the hedged object, and that credit risk shall not dominate the value changes in the hedging instrument. Under IFRS 9 a prospective effectiveness test is sufficient, whereas under IAS 39 hedge effectiveness must be considered both prospectively and retrospectively. Documentation of the hedging relationship is still required. The bank's assessment is that hedge accounting will be continued to approximately the same extent as today.

#### Loan impairment write-downs

Under current rules, IAS 39, impairment write-downs shall only be made in cases where there is objective evidence that a loss event has occurred since first-time recognition. Under IFRS 9, on the other hand, loss provisions shall be recognised based on expected credit loss (ECL). Measurement of the provision for expected loss depends on whether credit risk has increased significantly since first-time recognition. Upon first-time recognition, and when credit risk has not increased significantly since first-time recognition, provision shall be made for a 12-month expected loss. If credit risk has risen significantly, provision shall be made for expected loss across the entire life. The methodology in the IFRS 9 standard entails somewhat larger volatility in write-downs, and write-downs are expected to be made at an earlier stage than under current practice. This will be particularly noticeable at the start of a cyclical downturn.

#### Further description of the bank's future impairment write-down model

Loss estimates are to be prepared quarterly, and will build on data in the data warehouse which has historical accounting and customer data for the entire credit portfolio. Loss estimates will be computed based on 12-month and lifelong probability of default (PD), loss given default (LGD) and exposure at default (EAD). The data warehouse contains historical data for observed PD and observed LGD. In keeping with IFRS 9 the bank groups its loans in three stages.

##### Stage 1:

This is the starting point for all financial assets covered by the general loss model. All assets that do not have significantly higher credit risk than at first-time recognition receive a loss provision corresponding to 12 months' expected loss. All assets that are not transferred to stage 2 or 3 reside in this category.

##### Stage 2:

Stage 2 of the loss model encompasses assets that show a significant increase in credit risk since first-time recognition, but where objective evidence of loss is not present. For these assets a provision for expected loss over the entire lifetime is to be made. In this group we find accounts with a significant degree of credit deterioration, but which at the balance sheet date belong to customers classified as performing. As regards delineation against stage 1, the bank defines 'significant degree of credit deterioration' by taking a basis in whether the exposure's calculated probability of default shows a significant increase. SpareBank 1 SMN has decided to utilise both absolute and relative changes in PD as criteria for transfer to stage 2. The most important factor for a significant change in credit risk is the quantitative change in PD on the period end compared to the PD at first time recognition. A change in PD by more than 150 per cent is considered to be a significant change in credit risk. The change will have to be over 0.6 percentage points. In addition, customers with payments 30 days past due will be transferred to stage 2. A qualitative assessment is also done when engagements have been put on watch list.

**Stage 3:**

Stage 3 of the loss model encompasses assets that show a significant increase in credit risk since loan approval and where there is objective evidence of loss at the balance sheet date. For these assets a provision shall be made for expected loss over the entire lifetime. These are assets which under current rules are defined as defaulted and written down.

*IFRS 15 Revenue from Contracts with Customers*

The IASB and FASB have published a new converged standard for revenue recognition, IFRS 15 Revenue from Contracts with Customers, which replaces all existing standards and interpretations relating to revenue recognition. The core principle of IFRS 15 is that revenues are recognised in order to reflect the transfer of agreed goods or services to customers, and at an amount that reflects the compensation the company expects to be entitled to in exchange for such goods or services. The standard applies, with a small number of exceptions, to all remunerative contracts with customers and includes a model for recognition and measurement of sales of individual non-financial assets (for example sales of property, plant and equipment).

IFRS 15 will be implemented under either the full retrospective or modified retrospective method. The standard has accounting effect as from 1 January 2018. The standard will not have a significant impact on the group's principles for revenue recognition.

*IFRS 16 Leases*

The IASB published IFRS 16 in January 2016. The standard requires lessees to recognise assets and liabilities for the majority of leases in the same way as financial leases are accounted for under IAS 17 Leases. The lessee accounts for a "right to use asset" and an associated liability in the balance sheet. The asset is depreciated over the term of the lease, and the liability is measured at amortised cost. For lessors there are small changes relative to today's accounting standard, IAS 17 Leases.

Based on the leases entered into at 31 December 2017, the implementation of IFRS 16 would give a right-to-use asset of approximately NOK 110 million. The sale of SpareBank 1 SMN headquarter which is expected during first quarter of 2018 will result in a reduction of assets by NOK 600 million. The expected lease which will be entered into with the buyer of the property, will give a right to use asset in the balance sheet of approximately NOK 330 million when implementing IFRS 16 at 1 January 2019.

### Note 3 - Critical estimates and assessments concerning the use of accounting principles

In the preparation of the Group accounts the management makes accounting estimates, discretionary assessments and assumptions that influence the effect of the application of the accounting principles and hence the amounts booked for assets, liabilities, income and expenses. Estimates and discretionary assessments are evaluated continuously and are based on empirical experience and expectations of events which, as of the balance sheet date, are deemed likely to occur in the future.

#### Losses on loans and guarantees

The Bank rescues its loan portfolio monthly. Customers in a poor risk class, payment defaults, negative migration or other objective criteria are assessed for individual write-down. Should the Bank's calculations show that the present value of the discounted cash flow based on the effective interest rate at the time of estimation is below the book value of the loan, an individual write-down will be carried out. Impaired loans are reviewed quarterly.

Individual write-down of retail market commitments is calculated based on the same principles. Write-down is considered in the case of exposures larger than NOK 250,000 that are in default, or where the Bank has other relevant objective information. Write-down needs are estimated with a basis in estimated future cash flows. Uncertainty attends these estimates.

Collective write-downs are calculated for groups of commitments subject to rising credit risk but where it is not possible to identify which commitment will entail loss. Calculation is based on increase in expected loss on portfolios which have migrated negatively since the date of approval.

Assessment of individual and group write-downs will invariably be a matter of discretionary judgement. The Bank uses historical data as a basis for estimating the need for write-downs.

In cases where collateral values are tied to specific objects or industries that are in crisis, collateral will have to be realised in illiquid markets, and in such cases assessment of collateral values may be encumbered with considerable uncertainty.

In the case of events that have taken place, but have yet to be reflected in the Bank's portfolio monitoring systems, the need for write-downs is estimated on a group basis using stress test models.

See also note 2 on accounting principles and note 6 on risk factors.

#### Fair value of equity capital interests

Assets recognised at fair value through profit and loss will mainly be securities traded in an active market. An active market is defined as a market for trading of similar products where willing buyers and sellers are present at all times, and where prices are accessible to the general public. Shares quoted in a regulated market place fit in with the definition of an active market. A market with a large spread between bid and asked prices and where trading is quiet may pose a challenge. Some key shares will be based on in-house valuations, transaction prices or external analyses of the company. Such shares are valued using acknowledged valuation techniques. These include the use of discounted cash flows or comparative pricing where similar, listed, companies are used (multiple pricing) to determine the value of the unlisted company. Such assets could be encumbered with uncertainty. Assets classified as available for sale will also be recognised at fair value through other comprehensive income. Market values will generally be based on valuations or the latest known trade of the share. Shares which cannot be reliably valued will be carried at cost.

#### Fair value of financial derivatives and other financial instruments

Fair value of derivatives is usually determined using valuation models where the price of the underlying, for example interest rates or exchange rates, is obtained in the market. When measuring financial instruments for which observable market data are not available, the Group makes assumptions regarding what market participants would use as the basis for valuing similar financial instruments. The valuations require application of significant judgment when calculating liquidity risk, credit risk and volatility among others. Changes in these factors would affect the estimated fair value of the Group's financial instruments. For further information, see note 27 Measurement of fair value of financial instruments.

For options, volatilities will either be observed implicit volatilities or estimated volatilities based on historical movements in the price of the underlying instrument. In those cases where the Bank's risk position is approximately neutral, middle rates will be used. "Neutral risk position" is understood to mean for example that interest rate risk within a maturity band is virtually zero. Where market prices that are obtained are based on transactions with lower credit risk, this will be taken into account by amortising the original price difference measured against such transactions over the period to maturity.

#### Goodwill

The Group conducts tests to assess possible impairment of goodwill annually or in the event of indications of impairment. Assessment is based on the Group's value in use. The recoverable amount from cash flow generating units is established by calculating discounted

future cash flows. The cash flows are based on historical earnings and expectations of future factors and include suppositions and estimates of uncertain factors. The outcome of the impairment tests depends on estimates of discount rates which are set on a discretionary basis based on information available on the balance sheet date.

Regarding goodwill related to Romsdals Fellesbank, the portfolio is regarded as integrated in the Bank's other lending and deposit operations, and, as from 2009, the lowest level for the cash generating unit is the Parent Bank level. A net cash flow is estimated based on earnings in the Bank's loan and deposit portfolio. Earnings are estimated based on average portfolio and margin, and average commission income. Allocated costs are calculated with reference to the Bank's cost ratio in relation to total assets. A five-year average is employed in the calculation since this is considered to provide the best estimate of future cash flows. Expected loss on the loan portfolio is also calculated (0.3 per cent).

The cash flow is calculated over 20 years and is discounted by the risk-free interest rate + risk premium for similar businesses (pre-tax interest rate 10 per cent). Calculations show that the value of discounted cash flows exceeds recognised goodwill by a good margin.

Other goodwill in the Group is calculated based on average earnings in the market area and is discounted at the risk-free interest rate + the risk premium for similar businesses (12-14 per cent).

### Acquisition

Acquisition of another company is accounted for by the acquisition method. This method requires a full purchase price allocation (PPA) in which the purchase price is allocated to identified assets and liabilities in the acquired company. Excess values beyond those allocated to identified assets and liabilities are booked as goodwill. Any deficit values are, after careful assessment, recognised as income through profit/loss in the year of the acquisition (badwill). The analyses contain both concrete calculations and use of best judgement in arriving at the fairest possible value of the acquired companies at time of acquisition. Although some uncertainty invariably attends estimation items, they are supported by determinations of expected cash flows, comparable transactions in previous periods etc. See also note 40 on business acquisitions/business combinations.

### Non-current assets held for sale (IFRS 5)

SpareBank 1 SMN's strategy is that ownership resulting from defaulted exposures should at the outset be of brief duration, normally not longer than one year. Work on selling such companies is continuously in progress, and for accounting purposes they are classified as held for sale. See also note 39 on investments in owner interests.

### Sale of loan portfolios

In the transfer of loan portfolios to Eksporthfinans, SpareBank 1 Boligkreditt and SpareBank 1 Næringskreditt, the Group considers whether the criteria for derecognition under IAS 39 are met. At the end of the accounting year all transferred portfolios were derecognised from the Parent Bank's balance sheet. See also note 9 on derecognition of financial assets.

### Classification of hybrid capital

Sparebank 1 SMN issued two hybrid capital instruments in 2013 where the terms satisfy the requirements in CRD-IV to be included in Common Equity Tier One. From 2017 these have been classified as equity in the financial statements since the Bank consider the terms not to fulfill the conditions in IAS 32 to be classified as financial liability. The interest are not presented as an expense in the income statement, but as a reduction to equity. The change has entailed an overall reduction of NOK 44 million in interest expenses in 2017. Comparatives for 2016 are restated as shown below.

### Effects of the restatement

2016	Parent bank			Group		
	Reported previously	Correction Tier 1 capital	Restated	Reported previously	Correction Tier 1 Capital	Restated
<b>Profit/Loss</b>

## Note 5 - Capital adequacy and capital management

SpareBank 1 SMN utilises the Internal Rating Based Approach (IRB) for credit risk. Use of IRB imposes wide-ranging requirements on the bank's organisational set-up, competence, risk models and risk management systems. As from 31 March 2015 the bank has received permission to apply the Advanced IRB Approach to those corporate portfolios that were previously reported under the Basic Indicator Approach.

As of 31 December 2017 the capital conservation buffer requirement is 2.5 per cent, the systemic risk requirement is 3.0 per cent and the Norwegian countercyclical buffer is 2.0 per cent. These requirements are additional to the requirement of 4.5 per cent CET1 capital, so that the overall minimum requirement on CET1 capital is 12.0 per cent. In addition the financial supervisory authority has set a Pillar 2 requirement of 2.1 per cent for SpareBank 1 SMN, effective as from the fourth quarter of 2016. The total minimum requirement on CET1 capital is accordingly 14.1 per cent.

The countercyclical buffer increased from 1.5 per cent to 2.0 per cent with effect from 31 December 2017.

SpareBank 1 SMN has in fourth quarter 2017 reclassified two additional Tier 1 capital bonds from liabilities to equity, and the comparable figures has been restated. For further details, see note 1.

As from the fourth quarter of 2016 differentiated rates came into force for the countercyclical buffer. For exposures in other countries the countercyclical buffer rate set by the authorities in the country concerned is applied. If that country has not set a rate, the same rate as for exposures in Norway is applied unless the Ministry of Finance sets another rate. For the fourth quarter of 2017 the parent bank is below the capital deduction threshold such that the Norwegian rate is applied to all relevant exposures. For the group, the risk-weighted countercyclical capital buffer is 2.0 per cent.

Parts of the group's hybrid capital and subordinated debt were issued under earlier rules. This will be subject to a write-down of 40 per cent in 2016 and 50 per cent in 2017. The write-down will increase by another 10 per cent per year thereafter. As at 31 December 2017 the bank held hybrid capital worth NOK 450 million subject to write-down. For subordinated debt the figure was NOK 659 million.

## Note 6 - Risk factors

### Risk Management

SpareBank 1 SMN aims to maintain a moderate risk profile and to apply risk monitoring of such high quality that no single event will seriously impair the Group's financial position. The Group's risk profile is quantified through targets for rating, concentration, risk-adjusted return, loss ratios, expected loss, necessary economic capital, regulatory capital adequacy, and expected liquidity related regulatory requirements.

The principles underlying SpareBank 1 SMN's Risk Management are laid down in the risk management policy. The Group gives much emphasis to identifying, measuring, managing and monitoring central risks in such a way that the Group progresses in line with its adopted risk profile and strategies.

Risk management within the Group is intended to support the Group's strategic development and target attainment. The risk management regime is also designed to ensure financial stability and prudent asset management. This will be achieved through:

- A strong organisation culture featuring high risk-management awareness
- A sound understanding of the risks that drive earnings and risk costs, thereby creating a better basis for decision-making
- Striving for an optimal use of capital within the adopted business strategy
- Avoiding unexpected negative events which could be detrimental to the Group's operations and reputation in the market

The Group's risk is quantified by calculating expected loss and the need for risk-adjusted capital (economic capital) needed to meet unexpected losses.

Expected loss is the amount which statistically can be expected to be lost in a 12-month period. Risk-adjusted capital is the volume of capital the Group considers it needs to meet the actual risk incurred by the Group. The board has decided that the risk-adjusted capital should cover 99.9 per cent of all possible unexpected losses. Statistical methods are employed to compute expected loss and risk-adjusted capital, but the calculation requires expert assessments in some cases. In the case of risk types where no recognised methods of calculating capital needs are available, the Group defines risk management limits to ensure that the likelihood of an event occurring is extremely low. For further details see the Group's Pillar III reporting which is available on the Parent Bank's website.

The Group's overall risk exposure and risk trend are followed up through periodic risk reports to the administration and the board of directors. Overall risk monitoring and reporting are carried out by Risk Management which is independent of the Group's business areas.

### Credit risk

Credit risk is the risk of loss resulting from the inability or unwillingness of customers or counterparties to honour their commitments to the Group.

The Group is exposed to credit risk through all customer and counterparty receivables. The main exposure is through ordinary lending and leasing activities, but the Group's credit risk also has a bearing on the liquidity reserve portfolio through counterparty risk arising from interest rate and foreign exchange derivatives.

Credit risk associated with the Group's lending activity is the largest area of risk facing the Group.

Through its annual review of the Parent Bank's credit strategy, the Board of Directors concretises the Group's risk appetite by establishing objectives and limits for the Parent Bank's credit portfolio. The Parent Bank's credit strategy and credit policy are derived from the Parent Bank's main strategy, and contain guidelines for the risk profile, including maximum expected loss (EL) for the retail market and corporate market divisions respectively, maximum portfolio default probability (PD) and maximum regulatory capital (UL) allocated to the credit business.

Concentration risk is managed by distribution between Retail Banking and Corporate Banking, limits on the size of loan and loss ratio on single exposures, limits on maximum exposure to sectors, and limits on regulatory risk weighted assets for Retail Banking and Corporate Banking.

Compliance with credit strategy and limits adopted by the Board of Directors is monitored on a continual basis by Risk Management and reported quarterly to the Board of Directors.

The Parent Bank has approval to use internal models in its risk management and capital calculation (IRB), and in February 2015 was given permission to apply the advanced IRB approach.

The Parent Bank's risk classification system is designed to enable the Parent Bank's loan portfolio to be managed in conformity with the Parent Bank's credit strategy and to secure the risk-adjusted return. The Board of Directors delegates lending authorisation to the Group CEO. The Group CEO can further delegate authorisations to levels below executive director level. Lending authorisations are graded by size of commitment and risk profile.

The Parent Bank has a division dedicated to credit support which assists in or takes over dealings with customers who are clearly unable, or are highly likely to become unable, to service their debts unless action is taken beyond ordinary follow-up.

The Group uses credit models for risk classification, risk pricing and portfolio management. The risk classification system builds on the following main components:

### **1. Probability of Default (PD)**

The Group's credit models are based on statistical computations of probability of default. The calculations are based on scoring models that take into account financial position and behavioural data. The models are partly point-in-time oriented, and reflect the probability of default in the course of the next 12 months under current economic conditions. The Bank has also developed a cashflow based PD-model used for exposures in rental of commercial property. The Bank has engaged in a dialogue with Finanstilsynet to be able to use this model in the calculation of capital requirements (IRB).

Customers are assigned to one of nine risk classes based on PD, in addition to two risk classes for exposures in default and/or subject to individual impairment write down.

The models are validated on an ongoing basis and at least once per year both with respect to their ability to rank customers and to estimate PD levels. The validation results confirm that the models' accuracy meets internal criteria and international recommendations.

### **2. Exposure at Default (EAD)**

EAD is an estimation of the size of an exposure in the event of, and at the time of, a counterparty's default. For drawing rights, a conversion factor (CF) is used to estimate how much of the present unutilised credit ceiling will have been utilised at a future default date. For guarantees, CF is used to estimate what portion of issued guarantees will be brought to bear upon default. CF is validated monthly for drawing rights in the retail market and corporate market. The Group's EAD model takes account of differences both between products and customer types.

### **3. Loss Given Default (LGD)**

The Group estimates the loss ratio for each loan based on expected recovery rate, realisable value of the underlying collateral, recovery rate on unsecured debt, as well as direct costs of recovery. Values are determined using standard models, and actual realised values are validated to test the models' reliability.

Estimated loss ratio shall take into account possible economic downturn. With limited downturn data, the Bank has entered significant margins in its calculations to ensure conservative estimates when calculating capital requirements.

The three above-mentioned parameters (PD, EAD and LGD) underlie the Group's portfolio classification and statistical calculation of expected loss (EL) and need for economic capital/risk-adjusted capital (UL).

### **Counterparty risk**

Counterparty risk in derivatives trading is managed through ISDA and CSA contracts set up with financial institutions that are the Group's most used counterparties. ISDA contracts regulate settlements between financial counterparties. The CSA contracts limit maximum exposure through market evaluation of the portfolio and margin calls when the change in portfolio value exceeds the maximum agreed limit or threshold amount. The Group will continue to enter CSA contracts with financial counterparties to manage counterparty risk. See note 14 Financial Instruments and offsetting for further description of these contracts.

Counterparty risk for customers is hedged through use of cash depots or other collateral which, at all times, have to exceed the market value of the customer's portfolio. Specific procedures have been established for calling for further collateral or to close positions if market values exceed 80 per cent of the collateral.

SpareBank 1 Markets clears ordinary share trades executed at Oslo Børs through CCP settlements. The company is a direct clearing member of SIX X-Clear, and the counterparty risk is against SIX X-Clear.

### **Market risk**

Market risk is a generic term for the risk of loss and reduction of future incomes as a result of changes in observable rates or prices of financial instruments. Market risk arises at SpareBank 1 SMN mainly in connection with the Group's investments in bonds, CDs and shares, including funding. SpareBank 1 SMN has outsourced customer trading in fixed income and foreign currency instruments to

SpareBank 1 Markets. This customer activity, and SpareBank 1 Markets' use of the Parent Bank's balance sheet, also affect the Group's market risk.

Market risk is managed through limits for investments in shares, bonds and positions in the fixed income and currency markets. The Group's strategy for market risk lays the basis for management reporting, control and follow-up of compliance with limits and guidelines.

The Group defines limits on exposure to equity instruments with a basis in stress tests employed in Finanstilsynet's (Financial Supervisory Authority of Norway) models. Limits are reviewed at least once a year and adopted yearly by the Group's Board of Directors. Compliance with the limits is monitored by Risk Management and exposures relative to the adopted limits are reported monthly.

Interest rate risk is the risk of loss due to changes in interest rates in financial markets. The risk on all interest rate positions can be viewed in terms of the change in value of interest rate instruments resulting from a rate change of 1 basis point (0.01 percentage point). The Group utilises analyses showing the effect of this change for various maturity bands, with separate limits applying to interest rate exposure within each maturity band and across all maturity bands as a whole. Interest rate lock-ins on the Group's instruments are essentially short, and the Group's interest rate risk is low to moderate.

Spread risk is the risk of loss as a result of changes in market value/fair value of bonds due to general changes in credit spreads. The bond portfolio is managed based on an evaluation of the individual issuers. In addition, the Group has a separate limit for overall spread risk for all bonds. The Group calculates spread risk based on Finanstilsynet's module for market and credit risk. The loss potential for the individual credit exposure is calculated with a basis in rating and duration.

Exchange rate risk is the risk of loss resulting from exchange rate movements. The Group measures exchange rate risk on the basis of net positions in the various currencies. Limits on exchange rate risk are expressed in limits for the maximum aggregate foreign exchange position in individual currencies.

Equity risk is the risk of loss on positions as a result of changes in share prices. This risk is linked to positions in equity instruments as the underlying. Shares in subsidiaries and shares forming part of a consolidated or strategic assessment are not included.

### **Liquidity risk**

Liquidity risk is the risk that the Group will be unable to refinance its debt or unable to finance increases in its assets.

The Group's most important source of finance is customer deposits. At end-2017 the Group's ratio of deposits to loans was 51 per cent, including loans sold to SpareBank 1 Boligkreditt and SpareBank 1 Næringskreditt, compared with 49 per cent at end-2016 (Group).

The Group reduces its liquidity risk by diversifying funding across a variety of markets, funding sources, maturities and instruments, and by employing long-term funding. Excessive concentration of maturities heightens vulnerability with regard to refinancing. The Group seeks to mitigate such risk by applying defined limits.

The Parent Bank's finance division is responsible for the Group's financing and liquidity management. Compliance with limits is monitored by Risk Management which reports monthly to the Board of Directors. The Group manages its liquidity on an overall basis by assigning responsibility for funding both the Parent Bank and the subsidiaries to the finance division.

Governance is based in the Group's overall liquidity strategy which is reviewed and adopted by the board at least once each year. The liquidity strategy reflects the Group's moderate risk profile. As a part of the strategy, emergency plans have been drawn up both for the Group and the SpareBank 1 Alliance to handle the liquidity situation in periods of turbulent capital markets. These take into account periods of both bank-specific and system-related crisis scenarios as well as a combination of the two. An aim of the Group is to survive for 12 months of ordinary operation without fresh external funding. This assumes that the Parent Bank can continue to sell eligible loans to SpareBank 1 Boligkreditt, and that there will at all times be sufficient capacity in the stock of loans to cover a house price fall of up to 30 per cent and thus to maintain funding through the mortgage credit company. It also intends to succeed in surviving for 30 days under the most extreme crisis scenario. In such a scenario only the Parent Bank's holding of highly liquid assets may be utilised.

Access to capital has been satisfactory throughout 2017.

The Group's liquidity situation as of 31 December 2017 is considered satisfactory.

### **Operational risk**

Operational risk can be defined as the risk of loss resulting from:

- People: Breaches of routines/guidelines, inadequate competence, unclear policy, strategy or routines, internal irregularities
- Systems: Failure of IT- and other systems
- External causes: Criminality, natural disaster, other external causes

Operational risk is a risk category that captures the great majority of costs associated with quality lapses in the Group's current activity.

Management of operational risk has acquired increased importance in the financial industry in recent years. Contributory factors are internationalisation, strong technological development and steadily growing demands from customers, public authorities and other interest groups. Many substantial loss events in the international financial industry have originated in failures in this risk area.

Identification, management and control of operational risk are an integral part of managerial responsibility at all levels of SpareBank 1 SMN. Managers' most important aids in this work are professional insight and leadership skills along with action plans, control routines and good follow-up systems. A systematic programme of risk assessments also contributes to increased knowledge and awareness of current needs for improvement in one's own unit. Any weaknesses and improvements are reported to higher levels in the organisation.

SpareBank 1 SMN attaches importance to authorisation structures, good descriptions of procedures and clear definition of responsibilities in supply contracts between the respective divisions as elements in a framework for handling operational risk.

Management consider the Bank's IT –systems to be central for the operation, accounting and reporting of transactions in addition to providing the support for important estimates and calculations. The IT- systems are mainly standardised, and the management and operation has been outsourced to a service provider.

The Parent Bank has put to use a registration and monitoring tool (Risk Information System) for better structure and follow up of risk, events and areas for improvement in the Group.

Operational losses are reported to the Board of Directors. The Board of Directors receives each year from the internal audit and the statutory auditor an independent assessment of the Group's risk and of whether the internal control functions in an appropriate and adequate manner. The Board's assessment of the operational risk is moderate, including the risk related to the accounting and reporting process.

For further information see the Bank's Pillar III-report available at <https://www.sparebank1.no/en/smn/about-us/investor/financial-info/capital-adequacy.html> and notes:

Note 13: Maximum credit risk exposure

Note 14: Financial instruments and offsetting

Note 16: Market risk related to interest rate risk

Note 17: Market risk related to currency exposure

<b>Total net claims</b>	<b>2,839</b>	<b>2,348</b>

**Loans and other commitments to customers specified by risk group**

The Bank calculates default probabilities for all customers in the loan portfolio at the loan approval date. This is done on the basis of key figures on earnings, financial strength and behaviour. Default probability is used as a basis for risk classification of the customer. Further, risk classification is used to assign each customer to a risk group. See note 12 on credit risk exposure for each internal risk rating.

Customers are rescored in the Bank's portfolio system on a monthly basis.

Exposures are monitored with a basis in the exposure's size, risk and migration. Risk pricing of business exposures is done with a basis in expected loss and economic capital required for each exposure. Expected annual average net loss is calculated for the next twelve months. Expected loss is within the limits set for maximum expected loss by the Board of Directors, NOK 408m (326m) in the parent bank and NOK 445m (356m) in the group as of 31 December 2017.

Collectively assessed write-downs are calculated with a basis in customers who have shown negative migration since the loan approval date but for whom no individual write-down has been assessed.

The Bank uses macro-based stress tests to estimate write-downs required as a result of objective events that were not reflected in portfolio quality at the time of measurement.

Risk group default and written down consist of customers default by over 90 days and individual write-downs.

## Note 9 - Derecognition of financial assets

In its ordinary business the Bank undertakes transactions that result in the sale of financial assets. The Bank transfers such financial assets mainly through sales of customers' home mortgage loans to SpareBank 1 Boligkreditt or commercial property loans to SpareBank 1 Næringskreditt.

Payment received for loans sold to SpareBank 1 Boligkreditt and SpareBank 1 Næringskreditt corresponds to book value and is deemed to equal the loans' fair value at the time of sale.

In accordance with the management agreement with the above mortgage companies, the Bank is responsible for management of the loans and maintains customer contact. The Bank receives payment in the form of commission for the obligations ensuing from management of the loans.

The above mortgage companies can sell the loans bought from the Bank, while the Bank's right to service the customers and receive commission continues to apply. Should the Bank be unable to service customers, its right to service and commission may lapse. The Bank may have the option to repurchase the loans under given conditions.

If the mortgage companies incur losses on purchased loans, they have a certain right to settle such loss against commissions from all banks that have sold the loans. Hence a limited residual involvement exists related to sold loans in the event of a possible limited settlement of loss against commission. However, this opportunity of settlement is not considered to be of such a nature as to alter the conclusion that the great majority of risk and advantages is transferred. The Bank's maximum exposure to loss is represented by the highest amount reimbursable under the agreements.

The Bank has considered the accounting implications such that great majority of risk and advantages related to the sold loans is transferred to the mortgage companies. This entails full derecognition of sold loans. The Bank recognises any right and obligations that are created or retained in connection with the sale separately as assets or liabilities. No such assets or liabilities has been recognised as of 31 December 2017.

### **SpareBank 1 Boligkreditt**

SpareBank 1 Boligkreditt AS is owned by savings banks participating in the SpareBank 1 Alliance. The Bank has a stake of 19.85 per cent as of 31 December 2017 (19.09 per cent as of 31 December 2016). SpareBank 1 Boligkreditt AS acquires loans secured on dwellings and issues covered bonds within the applicable rules that were established in 2007. Loans sold to SpareBank 1 Boligkreditt are secured on dwellings at up to 75 per cent of property valuation. Sold loans are legally owned by SpareBank 1 Boligkreditt and the Bank has, over and above the right to be responsible for management and receipt of commission and the right to take over written-down loans in whole or in part, no right to make use of the loans. The Bank is responsible for management of the sold loans and receives commission based on the net of the return on the loans that the Bank has sold and the mortgage company costs.

In 2017 mortgage loans were bought and sold to a net value of NOK 1.7bn (1.2bn in 2016) to SpareBank 1 Boligkreditt. In total, mortgage loans to SpareBank 1 Boligkreditt were derecognised in an amount of NOK 34.9bn at the end of the financial year (NOK 33.1bn in 2016).

### *Liquidity facility*

SpareBank 1 SMN has, together with the other owners of SpareBank 1 Boligkreditt, entered an agreement for the establishment of a liquidity facility for SpareBank 1 Boligkreditt. Under this agreement the Banks undertake to purchase covered bonds issued by the mortgage company limited to the overall value of amounts falling due over the next 12 months at SpareBank 1 Boligkreditt.

The liability is limited to the mortgage company's obligation to redeem issued covered bonds after the company's own holding of liquidity at the due date is subtracted. Each owner is liable principally for its share of the need, subsidiarily for twice the primary liability under the same agreement. The bonds may be deposited in Norges Bank and therefore entail no significant increase in risk for the Bank. Under its liquidity strategy, SpareBank 1 Boligkreditt holds liquidity in compliance with the Net Stable Funding Ratio requirements. This liquidity reserve is taken into account in assessing the Banks' liability. Hence it is only in cases where the company no longer has sufficient liquidity to meet amounts falling due over the next 12 months that the Bank will report any exposure in this regard.

### *Financial strength*

Together with the other owners of SpareBank 1 Boligkreditt, SpareBank 1 SMN has also entered an agreement to ensure that SpareBank 1 Boligkreditt has at all times a common equity Tier 1 capital ratio of at least 9 per cent. The shareholders are required to supply sufficient core capital within 3 months of receiving a written request to do so, unless other initiatives are taken to reduce the capital need.

The shareholders' undertaking to supply such core capital is on a pro rata rather than a solitary basis, and is based on each shareholder's pro rata portion of the shares of SpareBank 1 Boligkreditt. Each owner is liable principally for its share of the need, subsidiarily for twice the primary liability under the same agreement. At year-end the company has about 16.7 per cent own funds, of which about 14.5 per cent

is core capital. Viewed in light of the mortgage company's very low risk profile, the Bank considers it unlikely that capital will be called up under this agreement and has opted not to maintain reserves to that end.

**SpareBank 1 Næringskreditt**

SpareBank 1 Næringskreditt AS is owned by savings banks in the SpareBank 1 Alliance. The Bank has a stake of 33.53 per cent as at 31 December 2017 (36.47 per cent). SpareBank 1 Næringskreditt AS acquires loans secured on dwellings and issues covered bonds within the applicable rules that were established in 2007. Loans sold to SpareBank 1 Næringskreditt are secured on commercial property at up to 60 per cent of property valuation. Sold loans are legally owned by SpareBank 1 Næringskreditt and the Bank has, over and above the right to be responsible for management and receipt of commission, and the right to take over written-down loans in whole or in part, no right to make use of the loans. The Bank is responsible for management of the sold loans and receives commission based on the net of the return on the loans that the Bank has sold and the mortgage company costs.

Commercial property loans sold to SpareBank 1 Næringskreditt were reduced by NOK 241m in 2017 (increased by NOK 608m in 2016). In total, mortgage loans to SpareBank 1 Næringskreditt were derecognised in an amount of NOK 1.8bn by the end of the financial year (NOK 2.1bn in 2016).

*Liquidity facility*

As described above with regard to SpareBank 1 Boligkreditt, a similar agreement has been entered with SpareBank 1 Næringskreditt.

*Financial strength*

An agreement to secure a core capital ratio of at least 9 per cent at SpareBank 1 Næringskreditt has been similarly entered into. See the above account concerning SpareBank 1 Boligkreditt.

## Note 10 - Age breakdown of contracts fallen due but not written down

The table shows amounts fallen due on loans and overdrafts on credits/deposits by number of days past due date not caused by payment service delays. The entire loan exposure is included where parts of the exposure have fallen due.

The realisable value of the collateral backing individually written-down loans totals NOK 540.0 million (NOK 853.6 million) for the Group at 31 December 2017.

## Note 12 - Credit risk exposure for each internal risk rating

The Bank uses a special classification system for monitoring credit risk in the portfolio. Risk classification is based on each individual exposure's probability of default. In the table below this classification is collated with corresponding rating classes at Moody's.

Historical default data are Parent Bank figures showing the default ratio (DR) per credit quality step. The figures are an unweighted average of customers with normal scores in the period 2011-2017.

Collateral cover represents the expected realisation value (RE value) of underlying collaterals. The value are determined using fixed models, and actual realisation value are validated to test their reliability of the model. In accordance with the capital requirements regulations the estimates are downturn estimates. Based on the collateral cover (RE value / EAD) the exposure is classified to one of seven classes, the best of which has a collateral cover above 120 per cent, and the lowest has a collateral cover below 20 per cent.

Credit quality step	Probability of default		Moody's	Historical default	Default 2017	Collateral cover		
	From	To				Collateral class	Lower limit	Upper limit
A	0.00 %	0.10 %	Aaa-A3	0.01 %	0.02 %	1	120	
B	0.10 %	0.25 %	Baa1-Baa2	0.04 %	0.02 %	2	100	120

\*) Other collateral includes cash, movables, ship and guarantees received. For covered bonds the cover pool comprises loans to customers in the company that has issued the bond.

The Bank's maximum credit exposure is shown in the above table. SpareBank 1 SMN provides wholesale banking services to BN Bank and the Samspar banks. In this connection a guarantee agreement has been established which assures full settlement for exposures connected to these agreements.

For retail and corporate customers, use is made of framework agreements requiring provision of collateral. For customers engaged in trading activity, only cash deposits are accepted as collateral. Customers furnish cash deposits and/or assets as collateral for their trade in power and salmon derivatives at NASDAQ OMX Oslo ASA and Fish Pool ASA. See note 37, Other debt and liabilities, for a closer description of NASDAQ.

The collateral is measured at fair value, limited to maximum credit exposure for the individual counterparty.

**Credit risk exposure related to financial assets distributed by geographical area**

## Note 14 - Financial instruments and offsetting

In the financial statement the group has no financial instruments that are entered on a net basis.

SpareBank 1 SMN enters into standardised and mainly bilateral ISDA agreements on netting of derivatives with financial institutions as counterparties. Additionally the Bank has entered into supplementary agreements on provision of collateral (CSA) with the most central counterparties. As of 31 December 2016 the Bank has about 25 active ISDA agreements. As from 1 March 2017 was required under EMIR to have in place a CSA with daily exchange of margin collateral etc. with all financial counterparties with which the bank deals domiciled (inter alia) in an EU member state. The Bank only enters into agreements with cash as collateral. The Bank has delegated responsibility for handling these agreements to SEB Prime Collateral Services which handles margin requirements on behalf of the Bank. More about collateral and encumbrances in note 37 Other debt and liabilities.

\*) Recognised financial instruments that do not meet some or all the criteria for net presentation under IAS 32 or contingent offsetting rights that can only be enforced and exercised in case of default, insolvency or bankruptcy on the part of the individual counterparties.

## Note 15 - Credit quality per class of financial assets

The Bank handles the credit quality of financial assets by means of its internal guidelines for credit ratings. See section entitled credit risk under note 6 Risk factors.

The table below shows credit quality per class of assets for loan-related assets in the balance sheet, based on the Bank's own credit rating system. The entire loan exposure is included when parts of the exposure are defaulted. Non-performance is defined in the note as default of payment of NOK 1,000 or more for more than 90 days.

## Note 16 - Market risk related to interest rate risk

This note is a sensitivity analysis based on relevant balance sheet items as of 31. December 2017. The Bank's interest rate risk is calculated by simulating a parallel interest rate shift for the entire interest rate curve of one percentage on all balance sheet items.

Interest rate risk has been low throughout 2017 and below the maximum limit of 600,000 set by the Board of Directors. For further details regarding interest rate risk, please refer to Note 6 Risk Factors.

<b>Basis risk Group (NOK million)</b>	<b>Interest rate risk, 1 % change</b>	
	<b>2017</b>	<b>2016</b>
<i>Currency</i>		
NOK	-39	-34
EUR	-8	2
USD	-1	-1
CHF	-1	-1
Other	-3	0
<b>Total interest rate risk, effect on result before tax</b>	<b>-52</b>	<b>-34</b>

Total interest rate risk suggests that the Bank will have losses from an increase in the interest rate in 2017. This is the same effect as in 2016.

The table below shows the effect of an interest rate curve shift on various time intervals and the associated gains and losses within the respective maturities.

<b>Interest rate curve risk, Group (NOK million)</b>	<b>Interest rate risk, 1 % change</b>	
	<b>2017</b>	<b>2016</b>

3 - 6 months	-12	-11
6 - 12 months	-8	10
1 - 2 years	-5	-1
2 - 3 years	-3	-6
3 - 4 years	15	-5
4 - 5 years	-27	-5
5 - 7 years	2	8
7 - 10 years	-5	-19
<b>Total interest rate risk, effect on result before tax</b>	<b>-52</b>	<b>-34</b>

## Note 17 - Market risk related to currency exposure

Foreign exchange risk arises when there are differences between the Group's assets and liabilities in a given currency. Currency trading must at all times be conducted within adopted limits and authorisations. The Group's limits define quantitative measures for maximum net foreign currency exposure, measured in Norwegian kroner.

The Group has established limits for net exposure in each individual currency, as well as for aggregate net foreign currency exposure (expressed as the highest of the sum of long and short positions). Overnight exchange rate risk for spot trading in foreign currency must not, on a net basis, exceed NOK 127.5 million per individual currency or NOK 150.0 million on an aggregate basis.

Foreign exchange risk has been low throughout the year. For further details see note 6 on risk factors.

85	128	Total per currency	128	85
1.0	1.8	Result effect of 3 % change	1.8	1.0

## Note 18 - Liquidity risk

Liquidity risk is the risk that the group will be unable to refinance its debt or unable to finance increases in its assets. See note 6 on risk factors for a detailed description.

## Note 22 - Personnel expenses and emoluments to senior employees and elected officers

All compensation arrangements at SpareBank 1 SMN are formulated in accordance with the Financial Institutions Act and with the Securities Trading Act with associated regulations concerning compensation arrangements at financial institutions, investment firms and mutual fund management companies.

The compensation committee conducts an annual review of compensation arrangements, and a written report is forwarded to the Board of Directors for scrutiny and approval. The compensation committee is required to ensure that the practising of the compensation arrangements is examined at least once yearly by independent control functions.

The Board of Directors is charged with approving and maintaining the compensation arrangements, and with ensuring that the documentation underlying decisions is safekept. The Board of Directors also approves any material change in or exception from the compensation arrangements.

The Group's guidelines for variable compensation are designed to assure that employees, groups and the business as a whole are compliant with the risk management strategies, processes and tools that the Group has put in place to protect assets and values. The compensation arrangements are formulated in such a way as to ensure that neither individuals nor the organisation take unacceptable risk in order to maximise the variable compensation. This entails inter alia that the basis for variable remuneration related to the entity's performance shall be a period of one year, and the earning period shall not be less than one year. SpareBank 1 SMN has no compensation arrangements for customer facing units that would be likely to encourage conduct which challenges the Bank's risk tolerance, ethical guidelines or which may contribute to conflicts of interest. The Bank has no compensation arrangements for control functions that would be likely to encourage conduct which challenges competence.

SpareBank 1 SMN's compensation arrangements also contain special rules for senior employees. For these groups the basis for variable remuneration related to undertaking's risk adjusted result is a period of at least two years. A minimum of 50 per cent of the variable remuneration is allocated in the form of equity certificates, which are tied and allocated in portions of one-third per year over three years.

An assessment has been made of whether other employees with compensation corresponding to that of the above groups should be subject to special rules under the above criteria. Reduction clauses have been introduced for instances where breaches of applicable rules or guidelines are brought to light. Reduction has its basis in the Group's sanction system

<sup>1)</sup> Defined-contribution pension scheme, pension rights accrued is paid amount for the year.

Until 30 June 2017 SpareBank 1 SMN has had an individual top pension scheme for employees with salaries above 12G and these employees receive pension add-on of 16 per cent of salary above 12G. The pension add-on will go to pension saving in products delivered by SpareBank 1 and can not be predisposed until retirement (62 years). To ensure equality with the phased-out scheme, compensation will be provided for tax on this pension add-on. This arrangement was closed 30. June 2017.

From 1 July 2017 a new pension scheme was established for employees with salaries above 12G. These employees receive pension add-on of 15 per cent of salary above 12G on an individual retirement account in SpareBank 1 Forsikring. Employees can decide investment profile and the savings are locked up until retirement age.

An early retirement agreement has been entered with the CEO in the event of his stepping down before reaching age 67, entailing a pension equal to 68 percent of pensionable income. This agreement is effective until the end of the month the CEO reaches 67 years. The

Bank's group occupational pension is included in the Bank's pension obligation to the Group CEO. The Group CEO also has an agreement on a dependants' benefit.

Executive directors has established early retirement agreements of up to 12 months. The size of these agreements will be in accordance with the compensation arrangements. An early retirement agreement has been established with one of the executive directors, granting this person the right to retire on reaching age 62. The pension is 68 per cent of pensionable income. The benefit associated with this arrangement is included in the basis for accumulated pension entitlement in the table above.

The number of equity capital certificates includes equity capital certificates owned by related parties and companies over which the individual exercises substantial influence.

## Note 24 - Pension

### Defined benefit scheme

This pension scheme is administered by a pension fund conferring entitlement to specific future pension benefits from age 67. The schemes include children's pension and disability pension under further rules. The Group's defined benefit pension scheme assures the majority of employees a pension of 68 percent of final salary up to 12G. The defined benefit scheme is closed to new members.

It was decided to terminate the defined benefit scheme at a board meeting on 21 October 2016. Employees on this scheme will transfer to the defined contribution scheme as from 1 January 2017, and will receive a paid-up policy showing rights accumulated under the defined benefit scheme. The termination resulted in reduced pension obligations, which has been treated as a settlement gain and reduced the pension expense for 2016.

Paid-up policies are managed by the pension fund, which becomes a paid-up pension fund as from 1 January 2017. A framework agreement has been established between SpareBank 1 SMN and the pension fund which covers funding, asset management etc. In view of the responsibility still held by SpareBank 1 SMN, future liabilities will need to be incorporated in the accounts. At yearend 2017 the scheme is overfunded by NOK 171 million.

The board of the pension fund is required to be composed of representatives from the Group and participants in the pension schemes in accordance with the articles of association of the pension fund. In addition to the pension obligations covered by the pension fund, the group has unfunded pension liabilities which can not be funded by the assets in the collective arrangements. The obligations entails employees not registered as member of the pension fund, additional pensions above 12 G, early retirement pension schemes and contractual early retirement schemes in new arrangement (AFP Subsidies Act).

For further details of the Group's pension schemes see Note 2 on accounting principles and Note 22 on personnel expenses and emoluments to senior employees and elected officers.

The pension scheme arrangement is located in its own pension fund, which has a long-term horizon on the management of its capital. The pension fund seeks to achieve as high a rate of return as possible by composing an investment portfolio that provides the maximum

risk-adjusted return. The pension fund seeks to spread its investments on various issuers and asset classes in order to reduce company-specific and market-specific risk. The portfolio thus comprises equity investments in Norwegian and foreign shares. The bond portfolio is essentially invested in Norwegian bonds. Bank deposits are placed in Norwegian Banks.

## Note 27 - Measurement of fair value of financial instruments

Financial instruments at fair value are classified at various levels.

### Level 1: Valuation based on quoted prices in an active market

Fair value of financial instruments that are traded in the active markets is based on market price on the balance sheet date. A market is considered active if market prices are easily and regularly available from a stock exchange, dealer, broker, industry group, price-setting service or regulatory authority, and these prices represent actual and regularly occurring market transactions at an arm's length. This category also includes quoted shares and Treasury bills.

### Level 2: Valuation based on observable market data

Level 2 consists of instruments that are valued by the use of information that does not consist in quoted prices, but where the prices are directly or indirectly observable for the assets or liabilities concerned, and which also include quoted prices in non-active markets.

### Level 3: Valuation based on other than observable data

If valuation data are not available for level 1 and 2, valuation methods are applied that are based on non-observable information.

The following table presents the Group's assets and liabilities measured at fair value at 31 December 2017:

Assets (NOK million)	Level 1	Level 2	Level 3	Total
Financial assets at fair value through profit/loss				
Derivatives	16	4,334	-	4,351
Bonds and money market certificates	2,547	17,189	-	19,736
Equity instruments	1,339	-	419	1,759
Fixed interest loans	-	43	3,236	3,278
Financial assets available for sale				
Equity instruments	-	-	66	66
<b>Total assets</b>	<b>3,902</b>	<b>21,566</b>	<b>3,722</b>	<b>29,190</b>
<b>Liabilities</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
Financial liabilities through profit/loss				
Derivatives	14	3,328	-	3,343
Equity instruments	239	4	-	244
<b>Total liabilities</b>	<b>254</b>	<b>3,332</b>	<b>-</b>	<b>3,586</b>

The following table presents the Group's assets and liabilities measured at fair value at 31 December 2016:

Assets (NOK million)	Level 1	Level 2	Level 3	Total
Financial assets at fair value through profit/loss				
Derivatives	44	4,708	-	4,752
Bonds and money market certificates	2,511	15,046	-	17,557
Equity instruments	959	-	524	1,483
Fixed interest loans	-	43	3,783	3,826
Financial assets available for sale				
Equity instruments	-	-	60	60
<b>Total assets</b>	<b>3,514</b>	<b>19,796</b>	<b>4,367</b>	<b>27,676</b>
<b>Liabilities</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
Financial liabilities through profit/loss				
Derivatives	48	4,026	-	4,074
Equity instruments	173	8	-	181
<b>Total liabilities</b>	<b>221</b>	<b>4,034</b>	<b>-</b>	<b>4,255</b>

The following table presents the changes in the instruments classified in level 3 as at 31 December 2017:

(NOK million)	Fixed interest loans	Equity instruments through profit/loss	Equity instruments available for sale	Total
Opening balance 1 January 2017	3,783	524	60	4,367
Investment in periode	304	20	-	323
Disposals in the periode	-849	-157	-20	-1,026
Gain or loss on financial instruments	-2	33	27	57
<b>Closing balance 31 December 2017</b>	<b>3,236</b>	<b>419</b>	<b>66</b>	<b>3,722</b>

During the reporting periode there has been no migration between the levels due to changes in valuation

The following table presents the Group's assets and liabilities measured at fair value at 31 December 2016:

(NOK million)	Fixed interest loans	Equity instruments through profit/loss	Equity instruments available for sale	Total
Opening balance 1 January 2016	4,405	574	108	5,087
Investment in periode	770	28	1	799
Disposals in the periode	-1,347	-66	-	-1,413
Gain or loss on financial instruments	-44	-13	-50	-106
<b>Closing balance 31 December 2016</b>	<b>3,783</b>	<b>524</b>	<b>60</b>	<b>4,367</b>

#### Valuation method

The valuation method applied is adapted to each financial instrument, and is intended to utilise as much of the information that is available in the market as possible.

The method for valuation of financial instruments in level 2 and 3 is described in the following:

##### *Loans to customers (level 3)*

The loans consist for the most part of fixed interest loans denominated in Norwegian kroner. The value of the fixed interest loans is determined such that agreed interest flows are discounted over the term of the loan by a discount factor that is adjusted for margin requirements. The discount factor is raised by 10 points when calculating sensitivity.

##### *Short-term paper and bonds (level 2 and 3)*

Valuation on level 2 is based for the most part on observable market information in the form of interest rate curves, exchange rates and credit margins for the individual credit and the bond's or certificate's characteristics. For paper valued under level 3 the valuation is based on indicative prices from a third party or comparable paper.

##### *Equity instruments (level 3)*

Shares that are classified to level 3 include essentially investments in unquoted shares. Among other a total of NOK 365 million in Private Equity investments, property funds, hedge funds and unquoted shares through the company SpareBank 1 Invest. The valuations are in all essentials based on reporting from managers of the funds who utilise cash flow based models or multiples when determining fair value. The Group does not have full access to information on all the elements in these valuations and is therefore unable to determine alternative assumptions. Determination of fair value for the shares of Polaris Media is based on valuation undertaken by SpareBank 1 Markets. The latter is based on value-adjusted equity capital.

The owner interest in Visa Norge FLI is considered to be a financial asset and is classified to the category 'available for sale'. SpareBank 1 SMN has calculated the fair value of its portion of Visa Norge FLI at NOK 31.5 million. Sensitivity at level 3 measurement: Since the estimated value of Visa Norge is calculated by the association we do not have access to all significant inputs, but SpareBank 1 SMN has taken into account a liquidity discount on the shares of Visa Inc. of 20 per cent. Had this been adjusted to 25 per cent, the fair value measurement would have been 1.6 million lower.

##### *Financial derivatives (level 2)*

Financial derivatives at level 2 include for the most part currency futures and interest rate and exchange rate swaps. Valuation is based on observable interest rate curves. In addition the item includes derivatives related to FRAs. These are valued with a basis in observable

prices in the market. Derivatives classified to level 2 also include equity derivatives related to SpareBank 1 Markets' market-making activities. The bulk of these derivatives refer to the most sold shares on Oslo Børs, and the valuation is based on the price of the actual/underlying share and observable or calculated volatility.

### Sensitivity analyses, level 3

<b>(NOK million)</b>	<b>Book value</b>	<b>Effect from change in reasonable possible alternative assumptions</b>
Fixed interest loans	3,236	-7
Equity instruments through profit/loss <sup>*)</sup>	419	-
Equity instruments available for sale	66	-2

<sup>\*)</sup> As described above, the information to perform alternative calculations are not available

## Note 28 - Fair value of financial instruments at amortised cost

### Financial instruments measured at amortised cost

Financial instruments that are not measured at fair value are recognised at amortised cost or are in a hedging relationship. For further details, see note 2 Accounting principles. Amortised cost entails valuing balance sheet items after initially agreed cash flows, adjusted for impairment.

Amortised cost will not always be equal to the values that are in line with the market assessment of the same financial instruments. This is due to different perceptions of market conditions, risk and discount rates.

Methods underlying the determination of fair value of financial instruments that are measured at amortised cost are described below:

#### *Loans to and claims on customers*

Current-rate loans are exposed to competition in the market, indicating that possible excess value in the portfolio will not be maintained over a long period. Fair value of current-rate loans is therefore set to amortised cost. The effect of changes in credit quality in the portfolio is accounted for through collectively assessed impairment write-downs, therefore giving a good expression of fair value in that part of the portfolio where individual write-down assessments have not been made.

Individual write-downs are determined through an assessment of future cash flow, discounted by effective interest rate. Hence the discounted value gives a good expression of the fair value of these loans.

#### *Bonds held to maturity*

Change to fair value is calculated by reference to a theoretical valuation of market value based on interest rate and spread curves.

#### *Loans to and claims on credit institutions, debt to credit institutions and debt to customers*

For loans to and claims on credit institutions, as well as debt to credit institutions and deposits from customers, fair value is estimated equal to amortised cost.

#### *Securities debt and subordinated debt*

The calculation of fair value in level 2 is based on observable market values such as on interest rate and spread curves where available.

Parent Bank		31 Dec 2017		31 Dec 2016

## Note 30 - Financial derivatives

All derivatives are booked at fair value through profit and loss. Gains are carried as assets and losses as liabilities. This applies both to derivatives used for hedging purposes and held for trading purposes. The Bank does not employ cash flow hedging.

The contract amount shows absolute values for all contracts.

For a description of counterparty risk and market risk, see note 6 on risk factors. For further details concerning market risk linked to interest rate risk, see note 16 on market risk related to interest rate risk, and for market risk related to currency exposure, see note 17 on market risk related to currency exposure.

## Note 31 - Shares, units and other equity interests

The Group classifies shares in the categories fair value through profit or loss and available for sale. Securities that can be reliably measured, and which are reported internally at fair value, are recognised at fair value through profit and loss. Other shares are classified as available for sale.

NOK 447m of the parent bank's balance sheet value refers to excess value in connection with the purchase of 100 per cent of Romsdals Fellesbank in 2005. The amount at group level refers to the parent bank's purchase of Romsdals Fellesbank as described above, the merger and acquisition of estate agencies from EiendomsMegler 1 Midt-Norge, and SpareBank 1 Regnskapshuset SMN's acquisitions of accounting firms. The year's increase of NOK 108m at group level relates to further acquisitions undertaken in 2017.

Goodwill items are valued annually and written down if impairment tests imply reduction in value. EiendomsMegler 1 Midt-Norge made a write down of goodwill of NOK 1.2m in 2017.

See note 3 - Critical estimates and assessments concerning the use of accounting principles - for a description of the valuation model for goodwill.

## Note 33 - Property, plant and equipment

**Depreciation**

With a basis in acquisition cost less any residual value, assets are depreciated on a straight-line basis over expected lifetime as follows:

- Technical installations 10 yrs
- Machinery 3 - 5 yrs
- Fixtures 5 - 10 yrs
- IT equipment 3 yrs
- Means of transport 10 yrs
- Buildings and other real property 25 - 33 yrs

**Collateral**

The Group has not provided security or accepted any other infringements on its right of disposal of its fixed tangible assets with the exception of SpareBank 1 Markets which has pledged inter alia business assets to DNB in connection with banking services related to the securities settlement.

**Acquisition cost of depreciated assets**

The acquisition cost of fully depreciated assets still in use in the Bank in 2017 is NOK 119 million (NOK 127 million).

**Gross value of non-current assets temporarily out of operation**

The Group has no significant non-current assets out of operation as at 31 December 2017.

**Collateral**

As from 1 March 2017 the bank is required under the European market infrastructure regulation (EMIR) to have in place a CSA with daily exchange of margin collateral etc. with all financial counterparties with which the bank deals domiciled (inter alia) in an EU member state. The Emir regulation regulates OTC derivatives and entails inter alia that SpareBank 1 SMN will be entitled to clear certain derivatives transactions through a central counterparty. This applies to interest rate derivatives in the major currencies (euro, US dollar, British pound and Japanese yen) along with Norwegian kroner, Swedish kronor and Polish zloty. Derivatives are cleared through London Clearing House as central counterparty where cash is the only collateral at present. SpareBank 1 SMN is not a direct member of London Clearing House, but has entered an agreement with Commerzbank as clearing broker. The bank has also entered an agreement with SEB as clearing broker number two, and plans to merge with them in the course of 2018.

SpareBank 1 SMN is registered as a GCM member of NASDAQ OMX Clearing AB. The bank offers customers clearing representation related to their trade in electricity and salmon derivatives on NASDAQ OMX Oslo ASA and Fish Pool ASA. Clearing representation entails that the bank substitutes itself in the place of the client as counterparty to NASDAQ OMX Clearing AB and takes on the obligation towards NASDAQ to furnish margin collateral and to execute settlement of contracts and pay charges. For the bank's exposure as a GCM, clients will furnish collateral in the form of a deposit of cash and/or encumbrance of other assets.

SpareBank 1 Markets clears ordinary share trades executed at Oslo Børs through CCP settlements. The company is a direct clearing member of SIX X-Clear. The company furnishes cash as collateral for the daily margin payments.

Parent Bank			Group	
Cash deposit	Total	Pledged assets	Total	Cash deposit
1,157	1,157	Pledged assets 31 Dec 2017	1,204	1,204
1,226	1,226	Relevant liabilities 31 Dec 2017	1,273	1,273
1,264	1,264	Pledged assets 31 Dec 2016	1,291	1,291
1,264	1,264	Relevant liabilities 31 Dec 2016	1,291	1,291

**Ongoing lawsuits**

The Group is not involved in legal disputes considered to be of substantial significance for the Group's financial position. No provision for loss has been made as of 31 December 2017.

### Operational leases

The group has entered a number of different lease agreements regarding premises, car park, alarm systems, IT systems and software. Most of the agreements include a lease extension option.

Lease costs comprised:

Parent Bank			Group	
2016	2017	(NOK million)	2017	2016
98	92	Ordinary lease payments	83	75
28	28	Payment received from sub-lease	44	26
<b>70</b>	<b>64</b>	<b>Total lease costs</b>	<b>39</b>	<b>49</b>

Future minimum lease payments related to non-cancellable lease agreements fall due as follows:

(NOK million)	Parent Bank	Group
Within 1 year	85	106
1-5 years	342	387
Above 5 years	414	473
<b>Total</b>	<b>841</b>	<b>965</b>

### Provisions

The group has made provisions for pension liabilities, see note 24, specified losses on guarantees, see note 11, restructuring and gifts.

The provision for restructuring is made based on the downsizing plan. Provision on gifts is the part of previous year's profit to be allocated to non-profit causes. More on this topic in the section corporate social responsibility.

### Companies held for sale

SpareBank 1 SMN owns 100 per cent of Maxi XV AS due to defaulted loans. SpareBank 1 SMN's strategy is that ownership due to defaulted exposures should at the outset be of brief duration, normally not longer than one year. Investments are recorded at fair value in the Parent Bank's accounts. In the Group accounts one-line consolidation is undertaken.

Assets and liabilities related to the property in Søndre Gate 4-10 in Trondheim City Centre (SpareBank 1 Kvartalet AS) has been reclassified as held for sale from Q4 2017 based on the approval from management and board of Directors for selling the property. SpareBank 1 SMN accepted a bid at Søndre Gate 4-10 at November 9, 2017. The transaction is expected to reach completion in the course of the first quarter of 2018 in the form of a real property company share disposal.

The tables below contain company or Group accounting figures on a 100 per cent share basis.

<b>2017 (NOK million)</b>	<b>Assets</b>	<b>Liabilities</b>	<b>Total income</b>	<b>Total costs</b>	<b>Company's result of the year</b>	<b>Ownership share</b>	<b>No. of shares</b>

## Note 40 - Business acquisitions/business combinations

### General

Upon acquisition of businesses a purchase price analysis is prepared in accordance with IFRS 3 where identifiable assets and liabilities are recognised at fair value on the acquisition date.

### Acquisition of accounting firms

SpareBank 1 Regnskapshuset SMN has in 2017 acquired SpareBank 1 Regnskapshuset Brekstad (prev. Fosen Rådgivning) and Økonomisenteret Kunderegnskap. These businesses are fully integrated into SpareBank 1 Regnskapshuset SMN in 2018.

SpareBank 1 Regnskapshuset Hareid, SpareBank 1 Regnskapshuset Ørsta, SpareBank 1 Regnskapshuset Volda, Areto Solutions, Datainformasjon og PR Regnskap has been merged into Sparebank1 Regnskapshuset SMN in 2017.

Purchase price allocations have been prepared in accordance with IFRS 3 in which identifiable assets and liabilities are recognised at fair value on the acquisition date. The difference between the group's acquisition cost and book value of net assets is allocated to goodwill. Effective from January 1, 2018 an agreement to acquire Tinde Økonomi, Rauma Regnskapsservice and Aktiva Regnskap has been made.

### Acquisitions in SpareBank1 Markets

In 2017 SpareBank 1 Markets acquired Allegro Kapitalforvaltning and SpareBank 1 Nord-Norge Forvaltning. The companies have been merged to SpareBank 1 Kapitalforvaltning, and is a subsidiary of SpareBank1 Markets. The company will spearhead SpareBank 1 Markets' asset management business with combined assets under management of NOK 10 billion. The company has 15 employees.

Purchase price allocations have been prepared in accordance with IFRS 3 in which identifiable assets and liabilities are recognised at fair value on the acquisition date. The difference between the group's acquisition cost and book value of net assets is allocated to client portfolio. The excess value allocated to Allegro Kapitalforvaltning has been eliminated in the group since this was already a subsidiary prior to the acquisition.

During fourth quarter the company acquired the trading table in SpareBank 1 SR-Bank Markets. The acquisition was financed by a share issue (176.341 shares at NOK 167, and premium of MNOK 37). In this transaction SpareBank 1 SR-Bank became share holders. The purchase price has been allocated to the client portfolio.

	Allegro Kapital- forvaltning	SNN Kapital- forvaltning	Trading Table i SR-Bank
Assets			
Fair value of client portfolio	34	15	37
Net identifiable assets and liabilities at fair value	17	3	0
Purchase price	50	18	37
Shares issued, at fair value	-	-	37
Cash	50	18	-
Purchase price	50	18	37

## Note 41 - Significant transactions with related companies

In this context 'related parties' means subsidiaries, associated companies, joint ventures and companies held for sale over which the Bank exercises substantial influence, as well as SpareBank 1 SMN Pensjonskasse (pension fund) and companies owned by the Bank's personal related parties. The Bank's outstanding accounts with employees and members of the Board of Directors are shown in note 8 on loans and advances to customers and note 22 on personnel expenses and emoluments to senior employees and elected officers. The opening balance may differ from the previous year's closing balance due to changes in which companies classified as related parties of the Bank during the period.

Loans (NOK million)	Subsidiaries		Other related companies	
	31 Dec 2017	31 Dec 2016	31 Dec 2017	31 Dec 2016
Outstanding loans as at 1 Jan	4,780	3,951	4,049	4,541
Loans issued in the period	1,445	894	515	37
Repayments	317	65	3	431
<b>Outstanding loans as at 31 Dec</b>	<b>5,909</b>	<b>4,780</b>	<b>4,561</b>	<b>4,147</b>

Commission income SpareBank 1 Boligkreditt	-	-	322	250
Commission income SpareBank 1 Næringskreditt	-	-	17	12
Issued guarantees and amount guaranteed	110	110	89	91

### Loans and deposits

All loans and deposits for related parties are booked in the Parent Bank.

### Securities trading

SpareBank 1 SMN's treasury department and subsidiary SpareBank 1 Markets, through outsourced business, carry out a large number of transactions with the Bank's related companies. Transactions are executed on a ongoing basis in the fixed income and forex area, payments transmission, bond trading etc. These transactions are part of ordinary bank operations and all agreements are contracted on market terms. Numbers above includes net investments in derivatives, bond transactions and deposits.

### Other transactions

SpareBank 1 SMN has signed supply agreements with several related companies in order to safeguard ordinary banking operations and further development of the SpareBank 1 Alliance. This includes development of data-technical solutions for alliance collaboration, commission from insurance and savings and investment products, administrative services, leasing of premises etc. The agreements are considered to be on market terms. In addition the Bank participates in increases of capital in related companies; see note 39 on investment in owner interests.

## Note 42 - ECC capital and ownership structure

### ECC capital

The Bank's ECC capital totals NOK 2,596,728,860 distributed on 129,836,443 equity capital certificates (ECCs), each with a face value of NOK 20. As at 31 December 2017 there was 8,788 ECC holders (8,498 as at 31 December 2016).

ECC capital has been raised by the following means:

Year	Change	Change in ECC capital (NOK)	Total ECC capital (NOK)	No. of ECCs
1991	Placing	525,000,000	525,000,000	5,250,000

## Note 43 - Earnings per ECC

Equity certificate (EC) holders' share of the profit is calculated as after-tax profit distributed in relation to the average number of ECs in the financial year. No options contracts are attached to the ECs so that diluted profit is consistent with earnings per EC. Upon presentation of accounts for 2016, earnings per EC were incorrectly stated as NOK 8.11. This has now been corrected in the comparative figures.

(NOK million)	31 Dec 2017	31 Dec 2016
Adjusted Net Profit to allocate between ECC owners and Savings Bank Reserve 1)	1,763	1,606
Allocated to ECC Owners 2)	1,128	1,027

**Note A**

SpareBank 1 SMN utilises co-owned bond-issuing residential mortgage companies as funding tools. This entails that when the bank grants a mortgage secured on residential property that meets given criteria, it can be sold to the residential mortgage company either at once or at a later point in time. Sale of the loan to SpareBank 1 Boligkreditt entails derecognition of the mortgage at SpareBank 1 SMN and recognition of the mortgage at SpareBank 1 Boligkreditt. Mortgages carrying floating interest are measured under IAS 39 at amortised cost. Under IFRS 9 only debt instruments forming part of a business model that entails holding the instruments in order to receive contractual cash flows shall be measured at amortised cost. Mortgages forming part of a business model that entails that the instruments are held both in order to receive contractual cash flows and for sale shall be measured at fair value with value changes over OCI. Interest income and write-downs shall be reflected in profit/loss, and value changes entered against OCI shall be reclassified to profit/loss upon sale or the disposal (derecognition) of the mortgages.

SpareBank1 SMN has therefore reclassified all residential mortgages from amortisert cost to fair value over OCI from 1 January 2018.

**Note B**

The "Available- for-sale" category under IAS 39 no longer exists under IFRS 9. Equity instruments classified as available for sale under IAS 39 has been reclassified to fair value over profit & loss.

**Note C**

Short-term money market paper and bonds constitute parts of the bank's liquidity reserve. The portfolio is managed and measured on a fair value basis and shall under IFRS 9 be classified at fair value with value changes over profit/loss.

**Note D**

The impact of adopting IFRS 9 as at 1 January 2018 will be taken to equity net after tax. Total change in equity due to adopting IFRS 9 as a result of changed loss provision is NOK -15 million.
