

## Note 5 - Capital adequacy and capital management

SpareBank 1 SMN utilises the Internal Rating Based Approach (IRB) for credit risk. Use of IRB imposes wide-ranging requirements on the bank's organisational set-up, competence, risk models and risk management systems. As from 31 March 2015 the bank has received permission to apply the Advanced IRB Approach to those corporate portfolios that were previously reported under the Basic Indicator Approach. The EU capital adequacy framework (CRR/CRDIV) was incorporated into Norwegian law with effect from 31 December 2019. The Basel I floor was accordingly removed and an SME rebate introduced.

As of 31 December 2020 the overall minimum requirement on CET1 capital is 12.5 per cent. The capital conservation buffer requirement is 2.5 per cent, the systemic risk requirement for Norwegian IRB-banks is raised to 4.5 per cent and the Norwegian countercyclical buffer is 1.0 per cent. These requirements are additional to the requirement of 4.5 per cent CET1 capital. In addition the financial supervisory authority has set a Pillar 2 requirement of 1.9 per cent for SpareBank 1 SMN, however not below NOK 1,794 million in monetary terms. As at 31 December 2020, reduced risk weighted assets mean that the minimum monetary requirement of NOK 1,794 million is binding for the Pillar 2 requirement. The Pillar 2 requirement therefore rises from 1.9 per cent to 1.93 per cent. The overall minimum requirement as of 31 December 2019 has accordingly increased from 14.4 per cent to 14.43 per cent.

The systemic risk buffer stands at 4.5 per cent for the Norwegian exposures. For exposures in other countries, the particular country's systemic buffer rate shall be employed. As of 31 December 2020 the effective rate for the parent bank and for the group is accordingly 4.4 per cent.

The countercyclical buffer is calculated using differentiated rates. For exposures in other countries the countercyclical buffer rate set by the authorities in the country concerned is applied. If that country has not set a rate, the same rate as for exposures in Norway is applied unless the Ministry of Finance sets another rate. For the fourth quarter of 2020 both the parent bank and the group is below the capital deduction threshold such that the Norwegian rate is applied to all relevant exposures.

The Supervisory Board adopted at its meeting on 26 March 2020 a revised proposal for application of the net profit for 2019 entailing an overall reduction of 303 NOK million compared with the original proposal of NOK 1,314 million for distribution as dividends and donations. Historical figures as at 31 December 2019 are not restated, but the effect of the above decision as at 31 December 2019 is shown in the table below.

The group's hybrid equity and subordinated debt issued under the old rules has now been redeemed such that as of the first quarter of 2020 the group has no holdings covered by the transitional provisions.
